

# Dhruv Singh

Full-stack developer focused on scalable backend systems, API infrastructure, and performance optimization

+91 8791967004 | [Dhruvsingh7077@gmail.com](mailto:Dhruvsingh7077@gmail.com) | [LinkedIn](#) | [GitHub](#) | [dhruvsh.com](https://dhruvsh.com)

## Career Objective

Results-driven full-stack developer experienced in architecting scalable REST APIs, high-performance caching, and AI-powered applications with Python, Django, NestJS, and Next.js. Proven track record of reducing latency and shipping production-grade systems as a full-time Software/Python Developer.

## Technical Skills

**Languages:** Python, JavaScript, TypeScript, SQL

**Python:** Django, DRF, FastAPI, Flask, Celery, pytest, NumPy, Pandas

**Frontend:** React, Next.js, Tailwind CSS

**Backend:** Node.js, NestJS, Express, Django, DRF, REST API Development

**Databases:** MongoDB, PostgreSQL, Supabase, Prisma

**Infrastructure:** Docker, Redis, RabbitMQ, AWS EC2

**Observability:** Prometheus, Grafana

**Tools:** Git, GitHub Actions, Vercel, Render

## Experience

### Python Developer Intern

Apr 2026 – Jun 2026

*Apponix Academy*

- Architected and implemented **RESTful API endpoints** and **ORM-based data models** using **Python** and **Django**, following scalable backend design patterns and production-grade coding standards.
- Developed a full-stack **Django + Next.js RAG chatbot** (see *AI Extractor*) as an independent capstone project, integrating **LLM-based semantic search**.

### Full Stack Developer Intern

Sept 2025 – Jan 2026

*Phyniks Dreamlabs LLP, Bangalore, India*

- Engineered scalable backend APIs with **NestJS** and built internal admin tooling with **Next.js**, streamlining platform operations.
- Designed **MongoDB** data models and delivered a **role-based admin dashboard** with **pagination and filtering**, enabling Super Admins to manage and monitor all store owners platform-wide.
- Built **analytics dashboards** displaying per-store owner performance, boosting operational visibility for admins.

## Projects

### AI API Gateway for LLM Workloads | *TypeScript, Node.js, Express, Redis, Docker, AWS EC2*

[Demo](#) – [Source Code](#)

- Built a centralized **API Gateway** routing LLM requests to multiple providers through a unified secure interface.
- Implemented **API key lifecycle management**, **rate limiting**, and **daily budget enforcement** for controlled API usage.
- Reduced median latency by **42.6%** and p95 latency by **26.1%** using **Redis response caching**.
- Increased cache-hit rate from **0% to 100%**, eliminating duplicate inference calls and reducing repeat-request cost by **100%**.
- Containerized services with **Docker**, deployed on **AWS EC2**, and set up **CI/CD pipelines** with **GitHub Actions** and **integration testing** for reliable automated deployments.

### AI Extractor | *Django, DRF, Next.js, LangChain, LangGraph, pgvector*

[Demo](#) – [Source Code](#)

- Built a full-stack **RAG chatbot** with **Django REST Framework** and **Next.js**, deployed across **Railway**, **Vercel**, and **Neon**.
- Indexed uploaded documents into a **pgvector** store, enabling **semantic search** and context-grounded AI responses.
- Orchestrated multi-turn conversational agents with **LangGraph**, persisting state across isolated **PostgreSQL** databases.
- Secured the API with **JWT authentication**, httpOnly cookies, and per-endpoint **rate limiting**, and documented endpoints with **drf-spectacular** for an interactive **Swagger** reference.
- Processed background jobs with **Celery** and **Redis**, and hardened the deployment with **HTTPS** and **CORS**.

## Education

### Acharya Institute of Technology

*B.Tech in Computer Science*

2022 – 2026

Bangalore, India

### St. Mary's Convent School

*12th Grade – Physics, Chemistry, Mathematics*

2021 – 2022
